### EX-EMPEROR OF AUSTRIA DEAD

Coronated Monarch Dies In Exile on Madeira Island

### STRICKEN WITH PNEUMONIA

Millions of Crowns Donated to Aid Former Ruler

FUNCHAL, Madeira — (Associated Press) — Former Emperor Charles of Austria-Hungary died here today.

Former Emperor Charles was taken ill at his home in exile on the island of Madeira slightly more than week ago. He was first said to be suffering from fever, but direct advice from Funchal on March 28, announced that his malady was pneumonia and later it was stated that he was suffering from pneumonia with cerebral complications. His condition became so serious Wednesday that extreme action was administered.

ILLIONS DONATED  
There was some improvement in the former ruler's condition Wednesday night but he failed to maintain this gain, and Friday's advances were that he was growing rapidly worse.

The illness of the ex-ruler excited widespread sympathy among the monarchists in both Vienna and Budapest.

One of the former court physicians started from Vienna in the hope of reaching Funchal and attending the ex-monarch, a subscription of several million crowns being raised to defray the expenses, while in Budapest it was reported that Count Julius Andrássy had sold a house in Rembrandt for 300,000 crowns to assist the exile.

### ONLY NEW BUGGY IN THE STATE OF OREGON SOLD

MEDFORD, Ore. — The only new buggy in Oregon, so far as a leading vehicle house of Portland was able to discern, has just been sold at the little town of Central Point, near here.

A man at Condon, Oregon, wanted to purchase a buggy and sent his order to a firm in Portland. A search of vehicle houses was unsuccessful.

### ILLINOIS MINERS ARE WARNED

Violence Believed Aimed in Circulars Distributed

SPRINGFIELD, Ill. — (Associated Press) — Instructions to Illinois miners to disregard circulars purporting to be from the communist party were issued from the miners' headquarters of district 12 today over the name of Frank Farrington, district president, who declared that union officials believe the circulars have been distributed not by communists but by detective agencies for the purpose of inciting miners to acts of disorder to make business for the detectives.

"You are urged to do everything possible to maintain order and to protect mining properties against acts of depredation," the message continued.

Approximately 95,000 miners suspended work in Illinois mines today in obedience to the strike order of the international union. President Farrington left tonight for Franklin to speak at a miners' meeting.

VICTIMS OF JOKE  
TRINWAY, OHIO — A gang of foreign laborers arriving here to take jobs in the coal mines found they were victims of an employment agent's April fool joke. The laborers said they paid three dollars each for the jobs after being told that the miners' strike only affected the Pittsburgh district.

### IRISH FREE STATE TROOPS ROUTED

Barracks Are Captured by the Rebel Forces

### GOVERNMENT WRECK AIMED

Republicans Plan Seizures of Public Buildings

DUBLIN — (United Press) — A coup d'état by republican rebels against the Irish free state before the new government had been established 24 hours, was feared today.

Dublin is filled with rebel troops who have come in from outlying districts. The streets this morning were thronged with followers of Eamonn De Valera and there was open talk of seizing public buildings and ousting the provisional government.

A proclamation issued in the name of eight rebel leaders, calling upon the army to renounce allegiance to the free state, caused alarm.

Throughout the country, particularly in the west, renewed activity of mutineers was reported. Police barracks were seized, loyal troops being driven out.

Hundreds of lorries, captured in Cork, have been driven away to some unknown rendezvous of rebel troops and there have been felled across the roads behind them to prevent pursuit.

BRIGADE MOBILIZED  
LONDON — (Associated Press) — The Dublin brigade of the Irish republican army "has been mobilized for parade tomorrow morning to take a new oath of allegiance or an oath with new implications" says a statement issued from the army headquarters in Beggar's Bush barracks, as telegraphed by the Daily Mail correspondent.

### DECREE AGAINST TROUSERS FOR WOMEN IS ISSUED

TIRANA, Albania — Trousers as the national costume for Albanian women are to disappear within the next generation.

The Mohammedan mothers have decreed this after seeing the smart comfortable and sensible dresses worn by the women members of the American Red Cross mission here, and observing the results of their work among the girls.

### NEW HIGH RECORD IN CRIME SET

37 Persons Murdered in New York During March

NEW YORK — (Associated Press) — March was a record month for violence in this city. Thirty-seven persons were murdered, according to records in the chief medical examiner's office.

Among them were three women, one of whom was shot and two stabbed to death. Of the 34 men slain, 30 were shot, three clubbed or black-jacked and one stabbed. Twenty-nine murders were committed in Manhattan, the others in Brooklyn.

In the last 48 hours one murder was committed by a woman, four bandits were captured in an attempt to rob a construction company's payroll; three men were shot and seriously wounded a department store sub-station manager in an attempt to rob him of \$3,000 and three other bandits clubbed a watchman and a guard and took \$1,000 from the counting room of a daily newspaper.

TWO DIE IN CRASH  
MACON, Ga. — Two men were dead and another is in a dying condition here today, as the result of an airplane striking a high smokestack into yesterday. The dead are John R. Costa, Anthony Kansas and Ray Roundtree, Portland, Ore. W. L. Fisher, of Mack, Colo., is not expected to live.

### HARDING TO ACT IN STRIKE SOON

Will Start Negotiations for Early Ending of Walkout

### WON'T PERMIT VIOLENCE

Orders Firm Hand Against Outbreaks, Bloodshed

(By HERBERT W. WALKER)  
WASHINGTON. — (United Press) — With a nation-wide mine strike on in full swing today, President Harding faces the first big domestic crisis of his administration.

Believing that he has done everything possible to prevent the walk-out the president now has one thought uppermost in his mind — "there shall be no violence."

The president has given the situation much serious consideration and has definitely determined how to meet the crisis.

ORDERS GIVEN  
Emphatic orders have gone to Attorney General Daugherty, it was learned today to use a firm hand in preventing outbreaks and bloodshed.

Harding has given the word that this must be a peaceful strike. The public is also to be given the utmost protection. Department of justice machinery has been geared up to nip at the start any attempt by coal dealers to take advantage of the strike to boost prices. Warning has already gone out to them.

There were strong intimations today that after the first heat of the strike has worn off, President Harding will start negotiations to bring an early end to the tieup. He made no effort today to conceal his disappointment at the refusal of the operators to enter into conference with union officials.

Meanwhile he has let it become known that he is sympathetic to a thorough investigation of the problem by congress.

### STRIKE DECLARED TO BE 100 PER CENT EFFECTIVE

Only Enough Men Left at Posts to Prevent Flooding of Pits—No Disorder Reported but State Troops are Moved to Coal Fields

(By FRED G. JOHNSTON)

INDIANAPOLIS. — (United Press.) — The coal strike called here declared today. Nearly 600,000 men were idle. Practically every one of the union miners and thousands of non-union men responded, President John L. Lewis said, except the pumpers, engineers and firemen, who will prevent flooding of the mines.

Lewis conferred frequently during the last two days with Secretary of the Interior William E. Green and district union chiefs, trying to devise some means to budge eastern operators from their opposition to interstate wage negotiations.

They also discussed the attitude of the federal and state governments. The officers are known to resent bitterly the apparent willingness to use troops and state constabulary to put down the strike.

Intelligence officers of the fifth army corps area, with headquarters at Fort Benjamin Harrison, are reported to have investigated the strike. State troops are available for use against the miners in Colorado and in Pennsylvania the state constabulary is moving from the rural districts into the mine fields, according to reports at headquarters. The federal government is also strengthening its forces in Wyoming, it was said.

Government agents are watching activities at union headquarters here. One department of labor representative conferred with Lewis. Lewis will leave late today to present the miners' side of the case to the president.

## PAINT SPECIAL SALE

# \$2.55

Per Gallon

ONE WEEK ONLY

SALE BEGINS TODAY

And Ends Next Saturday Night

April 1st to 8th

## Sale To Be Conducted At the Store of the Ottawa Paint Co.

### Bring the Measurement

of your house, width, length and height — we will tell you the quantity of paint to buy and the cost.

Deposit one-fourth of the cost and the material will be held for you, subject to your orders for ninety days from the date of sale. You will buy Paint — the Quality Paint — backed by us and the manufacturer's guarantee at \$2.55 per gallon, as explained elsewhere in this advertisement.

## SPECIAL SALE

# \$2.55

Per Gallon

ONE WEEK ONLY

SALE BEGINS TODAY

And Ends Next Saturday Night

April 1st to 8th

### Special Notice

During the week of the sale we will make a reduction of 10 per cent on all merchandise, except Lead, Oil and turpentine, from our regular retail prices.

Store Open from 7 a. m to 6 p. m.

Saturday Evenings Till 9 p. m.

# \$2.55

per gallon

## BUILDING COST AT LOWEST MARK

New York Bank Gives Views on Future Prices

HELD UP BY GREAT DEMAND

Probability of Increase is Seen By Forbes

(BY B. C. FORBES)

NEW YORK — (Special) — How much less does it cost to build today than it did when prices were sky-high?

Are building costs likely to go lower or higher in the near future?

Little wonder building came to a standstill, when you learn that it cost two and one-half times as much to build a home in 1920 as it cost in 1914. The same house, however, could be built today for less than three-fourths more than it cost before the war. Expressed differently, a two-story frame house which cost to build \$5,529 in 1914, would have cost \$12,815 in 1920, whereas it could be built now for \$9,562.

How about the outlook as to building costs?

The figures here given are from a comprehensive, thoughtful study of the whole subject issued by the Chemical National bank of New York, and as to the future of prices it says:

"General wholesale prices, as measured by the index number of the U. S. Bureau of Labor Statistics, seem to be stabilized at a level about 50 per cent above that of the pre-war period. Building costs are about this level, but many of the elements which bulk large in building costs, such as freight rates and wage rates, are less susceptible to downward revision than are commodity prices in general. The general housing shortage and the increasing volume of building at present levels are factors which serve to strengthen building material prices. While it is entirely possible, therefore, that building costs may decline still further, it is not probable that drastic declines will occur.

"The majority of the new building contracts awarded have been for residential buildings, with considerable work being done on educational and public buildings. There has been very little new building for industrial purposes, but during recent months there has been a slow increase in this field.

"Present tendencies indicate that the demand for new residential and public buildings will continue and will be augmented by a slowly mounting demand for new business and industrial buildings. The need for the latter is not urgent, but slowly reviving business will call for an increase in existing equipment. It is not impossible that building costs may decline further, but highly improbable that pronounced declines are in front of us. Given the existing conditions, one may look for steady activity in the building trades, as price levels are not materially different from those existing today."

The conclusion of the whole matter would seem to be that one is likely to incur little risk by planning to start building now.

In this connection, it is perhaps worth noting that steel prices have begun to rise and that there have been authoritative intimations that more pronounced and general advances will be announced next month. Also, the general price level, as measured by the recognized index numbers, has shown an advancing tendency during recent months.

On the other hand, rents are no longer rising and are fairly certain to decline quite a little during the next two or three years.

My own opinion is that where wages in the building trades have been thereby readjusted, building can be embarked upon, if there is where building trade wages are still being maintained at the war-time peak, it would probably prove profitable to wait a while.

I cannot refrain from adding, however, that the building and owning of one's own home is worth something that cannot be measured in dollars and cents.

## LIMA MAN BELIEVED TO HAVE BEEN KILLED IN TORNADO IN THE SOUTH

Charles Lyle, 449 N. West-st, uncle of Frederick Lyle, 27, sign painter, son of Mrs. Nettie Lyle, 133 E. Euclid-st, was unable to locate the writer of a letter to Lyle's wife in Lima, in which he declared that the body of an unidentified man, found after the tornado of March 20 in Davenport, Miss., was believed to be that of Lyle.

Charles Lyle has communicated with the mayor and police of Davenport in an effort to secure particulars in the case.

A Lima Y. M. C. A. membership card was found in a pocket of the clothing of the body, bearing the name of Fred. Lyle. It was issued in 1916.

Lyle left here in search of work in 1920 and had never been heard from since, relatives say. He has a wife and a son of three years residing in Lima and it was to Mrs. Lyle the friend of her husband in the south, sent the letter.

## SALE OF LAND SOUGHT IN SUIT FOR \$1,500

Foreclosure is sought in a petition filed in common pleas court by D. S. Early against W. H. Creps and his wife, Auglaize-tp. Sale of 145 acres of land, used as surety on a note which Creps and his wife gave to Early for \$1,500, is requested in the petition.

The Citizens' Building & Loan company, New Bremen, and Oliver Roberts, assignee of the Creps holdings, are made defendants in the case.

## ROSA-JOSEFA

THE "Siamese Twins," Rosa and Josefa, will be remembered when many now prominent statesmen and scientists will be forgotten even by the encyclopedia compilers.

Young folks of our generation will tell their grandchildren about Rosa and Josefa, freaks of nature that occur only once in billions of human births.

Sicily had a three-headed child, born 1822. The Tocci brothers lived many years the even their heads were fused together.

Original Siamese Twins were Chang and Eng, made famous by Barnum. They died in 1874, aged 63, at their home near Salisbury, N. C., within a few hours of each other. Rodica and Doodica, Hindu twins, were successfully divided by operation in Paris in 1902.

Nature, like history, repeats her exceptions which prove the rule.

## MONEY SHORTAGE

YOU can learn more about the future, by studying the financial statements of big corporations, than any astrologer ever claimed to read in the stars.

Dow, Jones & Company, financial experts, report that deficits are shown by about two-thirds of the 1921 industrial annual reports so far published.

A deficit means no profits available for taxation.

Congress is due to hear some bad news from the secretary of the treasury about a month from now. The bad news will be that there's a shortage of money to pay Uncle Sam's bills.

## DIVIDED WEALTH

TWELVE years ago, in the good old days when you could buy a meal for a quarter, the combined income of all Americans was \$31,400,000,000 a year.

That was \$340 a year for every man, woman and child.

It crept up to \$629 in the boom year, 1919. Now it has dropped to about \$450.

Do you ever argue about socialism? If everything were divided up and we all shared on an equal basis, there would be an income of about \$450 a year for every one in the country.

On that basis, would you and your family be better off? There isn't so much to be divided, after all.

## SWARMS OF PEOPLE

CHICAGO checks up and finds that it has nearly as much population as these eight western states combined: Idaho, Montana, Wyoming, Utah, Arizona, New Mexico, Nevada, North Dakota.

The situation is this: In 933 square miles of city there are crammed almost as many people as in 831,252 square miles of open country.

That is what is really wrong with America.

## FAST STENOGRAPHERS

A STENOGRAPHER who can rattle off 80 words a minute on the typewriter is considered fairly speedy.

At this speed, allowing five letters to the average word, the typist's fingers hit the keys 190 times a minute, or nearly seven times a second.

To accomplish this, each letter is carried to the brain, sorted out, identified, relayed over the nerves to the fingertips and the necessary muscles called into play to strike the right typewriter key.

This complicated process occurs seven times a second!

Thought is the fastest and most powerful force. Light, which travels 186,300 miles a second, is a snail beside thought.

In a fraction of a second you can run one of your thought waves out to a star so far away that it takes light millions of years to travel from the star to our earth.

Few people use this enormous power, thought, possessed by all except the mentally unbalanced.

WATCH a fast stenographer, pounding the keys so rapidly that her fingers receive nearly 200,000 tap shocks a day without causing more than mild nervous fatigue.

Apply those same taps to any other part of the body and insanity would speedily result.

One of the most terrible of medieval tortures was allowing water to trickle slowly, drop by drop, on the forehead of a prisoner bound to a bench. Victim always went crazy.

The typist takes that same torture daily, many times over, because she works up to it gradually in learning her trade.

Behold, there, the body's marvelous powers of adapting itself to new conditions.

It is this power of adjustment that enables men to stand the sudden changes brought by lost fortunes.

WHEN life gets monotonous and horesome, look about and examine the first thing that catches your eye.

Everything in the world has, locked up in it, as intense an interest as the things you learn by watching the typist's flying fingers.

That's what Horace Greeley meant when he said that a good reporter could write an interesting column about a cobbler's or a pin.

## AS YOU LIKE IT

People saying for a rainy day often mistake a drizzle for a flood.

Harding still hopes to go to Alaska. Why doesn't he join the marines and see the world?

It is estimated that on the first day of baseball 15,000,000 grandmothers will be buried.

Radio fan claiming he uses his hair for an aerial is probably talking thru his hat.

Another world war in 2014 is predicted. Congress had better start on the bonus bill now.

The man writing a book on hell probably got his idea from sleeping in an upper Pullman berth.

Coal strikes cost the public \$500,000,000 a year, but are not worth nearly that much.

They want an army division made up of women. Well, women have always been good at charging things.

## IN LIMA CHURCHES SUNDAY

Second Church of Christ, Scientist, Mezzanine floor, Lima House. Sunday morning service at 11, subject, "Unreality." Sunday school at 9:45 a. m. Wednesday evening testimony meeting at 8 o'clock, reading room at same location, open from 11 to 5 and from 7 to 9 p. m. These children will be confirmed on Pentecost Sunday and will receive their first Holy Communion on Trinity Sunday.

## WOMAN TOO WEAK TO WALK

Now Works Nine Hours a Day.—  
Lydia E. Pinkham's Vegetable Compound Restored Her Strength

Union Village, Vt.—"I was weak and nervous and all run-down. I could not walk across the floor without resting and I had been that way for weeks. I saw your advertisement in the paper and after taking one bottle of Lydia E. Pinkham's Vegetable Compound I felt the good it was doing me and I took seven more in all. Before I finished I was able to work nine hours a day in a steam laundry. I cannot say too much in favor of your medicine. I trust all sick and suffering women will take it. It has been two years since I took it and I am strong and well." Mrs. L. A. GUMMANN, Union Village, Vermont.

This is only one of such letters we are continually publishing showing what Lydia E. Pinkham has done for women, and whether you work or not Mrs. Gummann's letter should interest you.

Many women get into a weak, nervous run down condition because of ailments they often have. Such women should take Lydia E. Pinkham's Vegetable Compound at the first sign of trouble. Good health is necessary and this splendid medicine will help you to keep it.

## 'ROUND LIMA HOUR BY HOUR

BY OH. OH. JACKENRIM

A Page from the Diary of an Antiquated Reporter: 'Up betimes and the March rains continue, betimes. The zodiacs seem long on water, just like our own united commonwealths. To breakfast on a pate of prunes, a dish George himself invented. And very good it was. Picked up by the Circush coach; and dripped into the office. Saluted by a letter from my rich sister, portraying the lethal results of settling aside no eternal sinking fund. She thinks she will be more welcome up there, if she has been safe and sane down here since ancient times.

To lunch at Jake's place, gathered with the directors of the Rotary club. By unanimous vote the tender of a first-class super-coach for Rotary's ball team was accepted. John J. McGraw to send him late in April. Two votes against paying more than \$5,000 for six weeks' coaching, all the infinite.

They cannot last. If they could society could not last.

Too many people are playing with modern philosophies they do not understand, with false sciences and disturbing theories. They are interfering with the laws of the soul, trying with futile minds to comprehend the infinite. I believe it is dangerous for inexperienced people to study and deal with speculative theories, because it upsets them and gives them false standards. Seeking to explain love and marriage and divorce and human acts by psycho-analysis is delving into theories that are vapory and unreal. It disturbs the perfect balance between God's creation. His eternal law and our faculties of memory, and understanding.

best, captain of the team, thru his able and succinct discourse, convinced all but one absent director, that the price was really a bargain offer.

Chatted a bit with Harry Gorman, the railroader, and an old bon vivant playmate. And we recalled John Glancy, a regular fellow he was and is. To the office, whence came a pseudo-wise subscriber who made sardonic comment on Sunday papers. Requested we cease the magazine pages, as they were too startling. Do you think so? Neither do I. Then a fellow looper, who wanted to buy a page and sell it out to the unsophisticated at a dollar an inch. Remembering the golden rule and J. E. Morton's good work, we passed up this additional revenue to our leaking money coffers.

In the evening, for dinner with Madame Carrie, newly made maitre d'hotel of the reopened K. of C. dining rooms. Greeted in her own

naive manner, and my wife, poor wretch, enjoyed a good meal. For want of which she has long suffered in unapprobious silence; I, having reproached her for her groceries' charges. And she, sweetly and uncomplainingly having cut down the home menu. Rather clever, the wretch. But hard on me. Out for a look at the disinterred remains of the only gas lamp between Collett and Charles. Why did they take him out, he who was setting midway of the longest block in town. Maybe he is lying now under the shielding rays of an arc up on Marlan avenue.

In the evening to see Alice at the Faurot. A good cinema but hard on the poor Chinese who loved her not wisely, but too well. Despite her baby and divorce, Alice still has a nebulous pulchritude greatly satisfying to males under forty. If this rain and dampness continue, I'll be an nth degree hypochondriac. So for a hot bath, and to bed.

normal mentally, physically or morally. Theories that try to explain away the responsibility of human acts are a grave menace to society as well as the individual. We will be judged not by what we thought or by what we felt but by God's law. The sense of responsibility and the obligation of accountability for all of one's actions form the basis of society. We trust ourselves to the engineer of a railroad, to the captain of a ship, to the surgeon, to the person who sells us food. Why can't we trust God a little bit?

Faith is the basis of the everlasting things that count. Pagan philosophies are futile. Faith does not mean that we see a thing or know a thing clearly. When we do, it ceases to be faith—and becomes knowledge.

Man doesn't meet disaster in the air as long as he obeys the laws of the air. So he must obey the laws of the soul, and keep within the limitations set for him by God's eternal law. Otherwise disaster.

(Copyright, 1922)

## JAZZ, PSYCHOANALYSIS ARE SCORED

(BY MOST REV. PATRICK J. HAYES.)

Catholic Archbishop of New York NEW YORK —Jazz and such fantastic fads as psychoanalysis and advocacy of birth control, thru it man wants to dodge his responsibilities. Disaster awaits society when women measure their lives not by the number of their children, but by the number of their husbands. Divorce has become a national curse. To prevent human life by birth control is criminal and horrible—as much as taking life after conceiving. The latter kills a body, and the former centers both a soul and body an existence about to begin. It is pagan philosophy. Man alone cannot cure the ills of the times. He needs a Samaritan from above. Jazz and modern feminine dress and dramatic of the disorders in the intellectual, social and moral world. The symptoms are not as serious as the evils they conceal. If one does not lead a normal life one is apt to become very easily ab-
